Methodology

Recorded operating surplus = gross recorded farm receipts minus recorded operating expenditures. Source fees and levies are included once as expenditures. Loans, owner transfers, excluded source rows and unallocated statement transactions are not farm receipts. Shared overhead is retained separately and included once in business totals; enterprise and cycle filters exclude it. Self-reported totals are shown separately from document-extracted subtotals and never feed readiness indicators. This is a record summary, not net profit, an audit, independent verification or loan approval.
